Assistant Commissioner for Patents

Washington, D.C. 20231

Dear Sir:

Applicants herewith submit an amendment and response to the Office Action dated May 17, 2002. In particular, as per a conversation with the Examiner on June 25, 2002, Applicants are submitting a substitute specification which is a copy of U.S. Patent Application Serial No. 09/194,367 ('367 Patent Application) filed November 24, 1998, to which the present application is a continuation. Note that since that the present patent application is a continuation of the '367 Patent, which in turn, is the U.S. National Phase of PCT/US97/15892 filed Sept. 8, 1997, the substitute specification provided herewith is a copy of the original PCT patent application PCT/US97/15892 filed Sept. 8, 1997 with the same formatting (font and pagination) as this PCT. However, the substitute specification also includes the claims that were pending when the '367 Patent was filed.

Additionally, filed herewith is a revised copy of all requested amendments to the specification, wherein these specification amendments correspond with the page and line numbers of the substitute specification. Accordingly, all previously requested amendments to the specification are requested to be cancelled with the exception of the claim for the priority benefits of previous patent applications which was filed on October 31, 2000.

It is believed that the substitute specification and the corresponding specification amendments provided herewith address all the Examiner's concerns. Accordingly, reconsideration of the claims of
